**Useful Antibodies for Canine System**

This is a list of commercially available antibodies that we have tested on canine cells and/or tissues, and that we found to yield clear and specific marking of predicted targets.

We would be happy to post similar information from other labs. So you you have tested antibodies in the canine model, and are willing to share that information, please contact us.

Target Antigen		Target Species	Host Species	Poly/Mono	Congu-gate	Source	Cat. #	Method	Dilution
<b>VASA (MVH,DDX4)</b>	Synthetic C-terminal	Human	Rabbit	Poly	none	abcam	ab13840	IHC of testis	100X
<b>4-Oct</b>	Recomb. Protein	Human	Goat	Poly	none	R and D Systems	AF1759	IHC of testis	20X
<b>DAZL</b>	C-term Peptide GNGPQKKS	Human	Goat	Poly	none	NOVUS	NB100-2437	IHC of testis	50X
<b>PLZF</b>	Recomb. (aa 1-154)	Human	Goat	Poly	none	R and D Systems	AF2944	IHC of testis	40X
<b>GATA 4</b>	C-terminal 20 aa	Mouse	Goat	Poly	none	Santa Cruz	sc-1237	IHC of testis	50X
